SievesPOS Demo Starter Guide

Quick access guide for testing and production use of the HASQ SievesPOS portal.

1. Portal Access

Environment	URL
Demo / Testing	https://test.hasq.org/pos/login
Production	https://hasq.org/pos/login

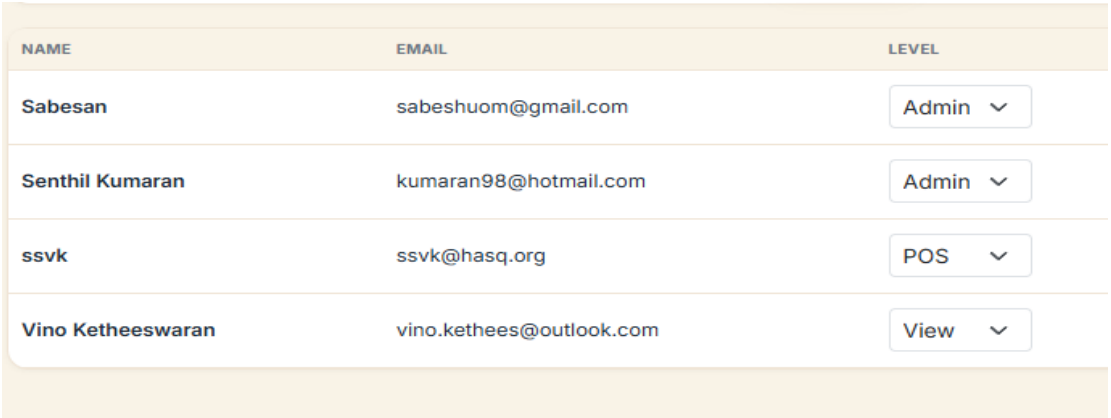
2. User Access Levels

Level	Access
Admin	Full administrative access: manage transactions, approve bank/cash transactions pledged through QR code, manage users and PINs, and review system logs.
POS	POS entry access for processing normal point-of-sale transactions.
View	A View-level user is currently configured in the system. Access is limited according to the permissions assigned to this role.

3. Current Users

Name	Email	Level
Sabesan	sabesh-uom@gmail.com	Admin
Senthil Kumaran	kumaran98@hotmail.com	Admin
ssvk	ssvk@hasq.org	POS
Vino Ketheeswaran	vino.kethees@outlook.com	View

Current user configuration (reference)



4. POS Login / PIN Users

Username	Access Level	PIN
senthilk	Admin	Use assigned PIN
sabesans	Admin	Use assigned PIN
ssvk26	POS	Use assigned PIN

Security note: The actual PIN values were not included in the supplied information, so they are intentionally not shown in this guide. Share PINs separately through a secure channel.

5. Quick Demo Steps

1. Open the test portal. Use the Demo / Testing URL above for demonstrations and testing.

2. Sign in with the appropriate user. Use an Admin account for administration functions or the POS-level account for POS entry.

3. POS user: Open the POS interface and create a normal POS entry.

4. Admin user: Review transactions, approve eligible bank/cash QR-code pledges, manage users and PINs, and review logs.

5. Production: Use the production URL only when you are ready to work with the live system.

Important: Always use the test portal for demonstrations or trial transactions. Production activity should be treated as live data.
